Distance to Materials	Above	Sides	Back
To Combustibles	375mm	600mm	600mm
To Non-combustibles	375mm	100mm	100mm

For best performance we recommend these distances to non-combustible materials.

A Heat Shield reduces the rear distance to combustibles to 200mm, but will not reduce the distance to non-combustibles.

Clock stoves must be placed on a hearth with a minimum thickness of 12mm.

# Clock Blithfield 5

This 5kW multi-fuel stove combines outstanding performance with elegant design. With an impressive heat output range of 3.5kW to 7.5kW, you can choose to add height with the addition of an optional log store and add a splash of colour with a choice of finishes.
